

# Custom Geocoin Design

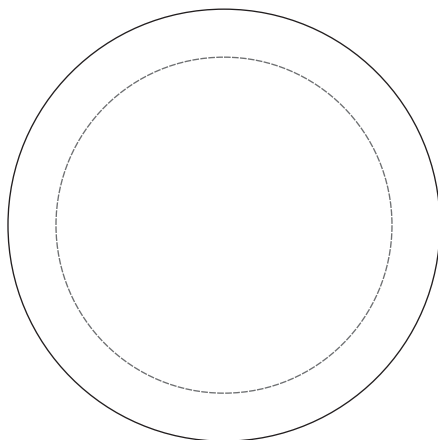

---

1. Natural wood pieces = White  
Engraved pieces = Black  
Cut out pieces = Yellow
2. Cut out pieces may not go within grey dashed line
3. Back design may not go within grey dashed line\*
4. Email to [designs@woodennickelgeocoins.com](mailto:designs@woodennickelgeocoins.com)

## FRONT

## BACK

### Custom One Side

Custom one side geocoins are 2 1/4" in diameter. The natural wood and engraved areas can go to the full extent of the coin. Cut out areas must be within 1/4" border (dashed line) around the outside.

### Custom Two Side

Custom two side geocoins are 2 1/4" in diameter. The natural wood and engrave areas can go to the full extent of the coin on the front but must leave 1/4" border (dashed line) around the outside on the back. Cut out areas must be within 1/4" border (dashed line) around the outside.

### \*Custom Shape One Side

Custom shape/design one side geocoins can be up to 2 3/4" in diameter. Any shape can be designed as long as the back of the coin provides enough area for the trackable coin information (tracking code and "Track on Geocaching.com"). The natural wood and engraved areas can go to the extent of the custom shape.

**Custom Wooden Geocoins • No Minimum Quantity**
